## Summary

Born and raised in Novopolotsk, Belarus. I graduated in machinery engineering in 2011. Between 2011 and 2021, I worked in the energy industry. I have been studying manual testing and improving my skills since late 2021. I am open-minded and self-motivation person. I want to start a career as a junior QA engineer at the firm and in two years grow up to mid QA. Likewise, I am not ready to relocate, and I want to work remotely from my quiet place for family reasons.

## Work Experience

### Junior QA Engineer

2022-05 - current time

Practice on Vadim Ksendzov's course "Software Testing"

Practical training on the course in progress now. (<https://github.com/APavlyuchenko>)

Already used:

- **Linux Terminal** (using cd, ls -la, touch, mkdir, mv, rm, grep, tail commands)
- **Postman** (checking status code, request and response parsing)
- **Android Studio** (building, running and testing the ToDoList application on a simulator and a real device)
- **SQL** (using select, where, like, inner join)
- **JavaScript** (basic concepts)

### Junior QA Engineer (Trainee)

2022-01 - 2022-03

A1QA Training center, Minsk

#### Projects:

1. **Information-analytical system of medical institution** (web application for checking the quality of medical staff work for 3 types of users),
2. **Albany Aqua Ducks** (web application for creating sea tours and charter flights for 4 types of users, payment info)
3. **Gregory Olsen Photostudio** (website is a business card of photographer Gregory Olsen with sections Demo, Sessions, Connect, Bio&Press and payment.),
4. **Voyage database** (web application for creating excursions for various students and teachers, including back-end and front-end sides),
5. **Café "Offline" menu** (web application for ordering various dishes online for a week, calculating the cost, debiting from the balance),
6. **Calculator** (simple application for calculating the logarithm and square root)
  - Documentation of software defects using a bug tracking system.
  - Performing functional testing of projects.
  - Performing non-functional testing of projects (GUI, Usability, Security, Localization).
  - Creating documentation for testing (Check List, Acceptance Sheet, Test Survey).
  - Preparation of a Quality Report after testing.
  - English language training with a campaign teacher.
  - Participation in daily meetings, team buildings etc.

### Welding master

2011 - 2021

Thermal power station, Novopolotsk

## Area of Expertise

Operation Systems and Platforms	Windows. Android, IOS
Databases	SQL
Bug Tracking System	Jira
English	Pre-Intermediate
Other	Oracle Virtual Box, Chrome Dev Tools, Brackets, Charles

## Education

### Engineer

2006 - 2011

Polotsk State University, Novopolotsk

## Soft Skills

- Strong analytical skills
- Comfortable with multitasking
- Long term Software QA career minded
- Positive attitude

## Hobbies

- Table tennis
- Pilates
- Motorcycles
- Training gym

## Achievements

Main achievement at my old work, I proved to the management the advantages of using new technologies when performing heat treatment of welding seams, thereby purchasing new modern equipment.
